ePassport technology

National ID cards have undergone a huge transformation and digital identity technologies such as smart cards and biometrics have come of age. It is forecast that the number of electronic National ID cards in circulation will reach 3.6 billion citizens by 2021. More than 120 countries are now issuing electronic passports with 1 billion ePassports currently in circulation. Unlike conventional passports, the

electronic passport has a microprocessor which stores a digital version of the ID photo as well as all of the ID data found on the first page of the paper passport. For 15 years, our "Top 50 Suppliers of ePassport Technology" features the most active players in the ePassport and eID evolution, who are driving advancements in biometrically enabled, machine-readable identities and travel documents (MRTDs).

- » **Manufacturing digital eIDs**

NBS Technologies has remained a leading developer and provider of equipment for card personalization, EMV compliance/migration, smart card manufacturing and semiconductor handling equipment. Governments are clearly the most sensitive and aware of security and access control issues – National Security has never been more important. At NBS, we can deliver card personalization and card printing systems to governments that meet the needs of virtually any specific application. In either an instant, on-the-spot issuance scenario, remote/distributed/branch issuance or via a centralized card production facility, NBS has the solution that fits.

SPS

INL, PL

Providing secure and high added value components for card and document manufacturers

SPS has delivered several million epassport inlays and e covers based on its unique ebooster technology to Asian, African, and European countries. The Teslin based inlay uses an inductive coupling technology, where there is no physical connection between the antenna and the chip's module enhancing the durability of the passport. SPS' technology is designed to accept all chip and OS suppliers on the market, offering a highly reliable and cost effective solution to passport manufacturers. SPS offers unique security features which gives the final passport a unique added value. SPS also proposes a complete offer for Polycarbonate data pages from finished datapage to hinge inlay and electronic components.

180 people. Part of IN Groupe, one of the global leaders in secure identity solutions, the company specializes in contactless and dual-interface products, with a recognized micro packaging expertise. SPS has filed over 120 patents supporting its exclusive technologies.

As a world leader in secure and electronic components for banking and government markets, the company brings value to its customers by pre-certifying the performance of cards using its technology and guaranteeing card functionality in the field.
